

# Geberit AquaClean 8000 Plus Care Bidet Toilet and Seat

Colour: White

Anyone looking for a combination of elegant design and top-of-the-range functionality will find that the Geberit AquaClean 8000plus enhances any bathroom. It combines all the benefits of the Geberit AquaClean range, including eye-catching design and numerous luxury functions. It doesn't just clean - it pampers.

## **Sophisticated shower function**

Simply press the button and a spray of water at body temperature and at your chosen pressure will cleanse you gently and effectively. This is cleanliness in its most pleasant form. The Geberit AquaClean 8000plus has additional luxury features including:

### **Oscillating shower**

The regular forward and backward movements of the spray of water produces particularly thorough results.

### **Massage shower**

The pulsating massage shower is pleasant and relaxing and can be adjusted to suit.

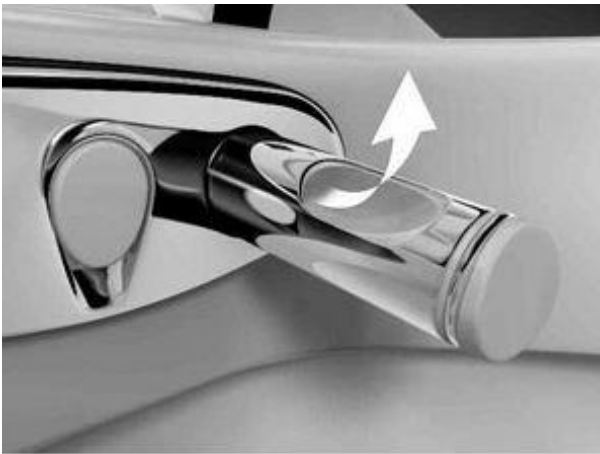

### **Lady shower**

This gentle spray cleans the sensitive areas carefully and comfortably.

### **Warm-air dryer**

The most pleasant way of drying after a shower is to use the warm-air dryer, which has adjustable temperature settings.

### **Personal settings**

On the Geberit Aquaclean 8000 Plus Care user has different needs and therefore the settings of all the functions, including the position of the shower arm, the temperature and pressure of the water spray and the dryer, can be individually adjusted and saved.

### **Personal settings**

Every user has different needs and therefore the settings of all the functions, including the position of the shower arm, the temperature and pressure of the water spray and the dryer can be individually adjusted and saved.

## **Perfect cleanliness**

The shower-nozzle is automatically rinsed with fresh water and JETCLEAN nozzle-cleaner before and after each use. In addition, the special ceramic surface has dirt-repellent properties making it particularly easy to clean.

## **Remote control**

The Geberit AquaClean 8000 plus Care is easy to use, either via the clearly designed controls on the side of the WC or the handy remote control unit. The memory function allows individual settings to be accessed at the press of a button.

## **Air-purification system with active carbon filter**

Geberit AquaClean recognises when someone sits on the toilet seat and automatically switches on the air-purification system, preventing unpleasant odours from spreading into the room.

## **Ergonomically designed seat and lid**

Like all Geberit AquaClean models, this one also comes with an automatic closing function. Special dampers silently cushion the seat and lid as they are lowered. The seat has an ergonomic design and can easily be removed for cleaning.

## **Child-safety feature**

Children are naturally attracted to water, so the user recognition system also includes a child-safety feature. The shower and dryer functions can only be used when someone is sitting on the WC.

## **Enhance your bathroom**

The Geberit AquaClean 8000plus has an exciting range of functions, but it is also an eye-catching feature of the bathroom, with timeless elegance, smooth lines and compact design. Even where no structural work or alterations are planned, Geberit has the perfect solution: by using the smart Geberit AquaClean design panel, a luxurious new integrated solution can be fitted in next to no time, with no structural modifications needed.
